

El matemático y lógico [John Venn](#) (1834-1923) falleció hace 90 años. Publicó tres textos sobre lógica, su área de mayor interés: [The Logic of Chance](#) (1866)

–"La lógica del Azar"–,

[Symbolic Logic](#)

(1881) –"Lógica Simbólica", en el que introdujo sus conocidos los diagramas de Venn– y

[The Principles of Empirical Logic](#)

(1889) –"Los Principios de la Lógica Empírica"–.

En 1883, fue elegido miembro de la prestigiosa [Royal Society](#) .

Su 'popularidad' se debe a su famoso método de representación gráfica conocida como [diagramas de Venn](#).

Ya habíamos hablado anteriormente en **ZTFNews** de diagramas de Venn en [Newroz, un diagrama de Venn para 11 conjuntos](#) y en [Un diagrama de Venn para los “estados químicos”](#); hoy os quiero traer otros ejemplos de estas conocidas ilustraciones.

Este diagrama de Venn está situado en un ventanal del Colegio de Gonville y Caius (Cambridge, UK). El texto en la ventana dice JOHN VENN; FELLOW 1857–1923; PRESIDENT 1903–1923.

Mythical Creatures

The diagram illustrates the composition of various mythical creatures based on their relationship to a central 'Human' element. The creatures are represented as overlapping circles, where the central circle is 'Human' and the surrounding circles represent other mythical creatures. The overlapping areas indicate the combination of these elements.

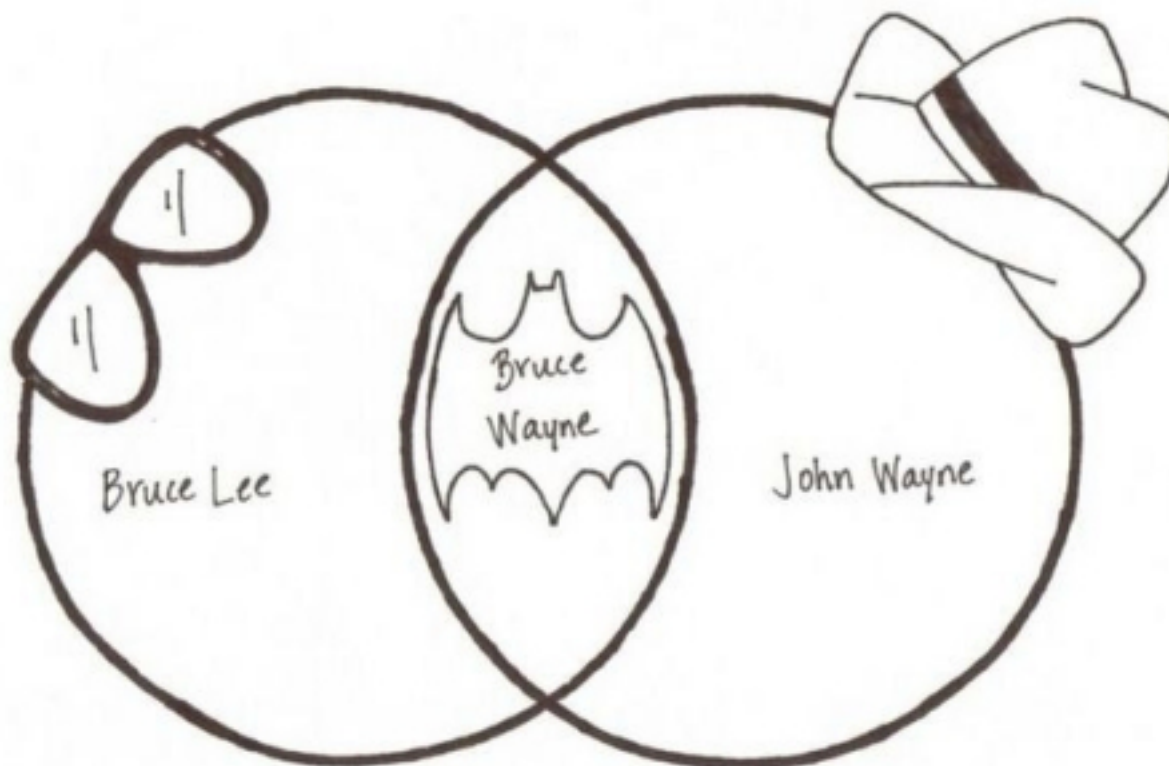

Central Circle: Human

Surrounding Circles and Overlaps:

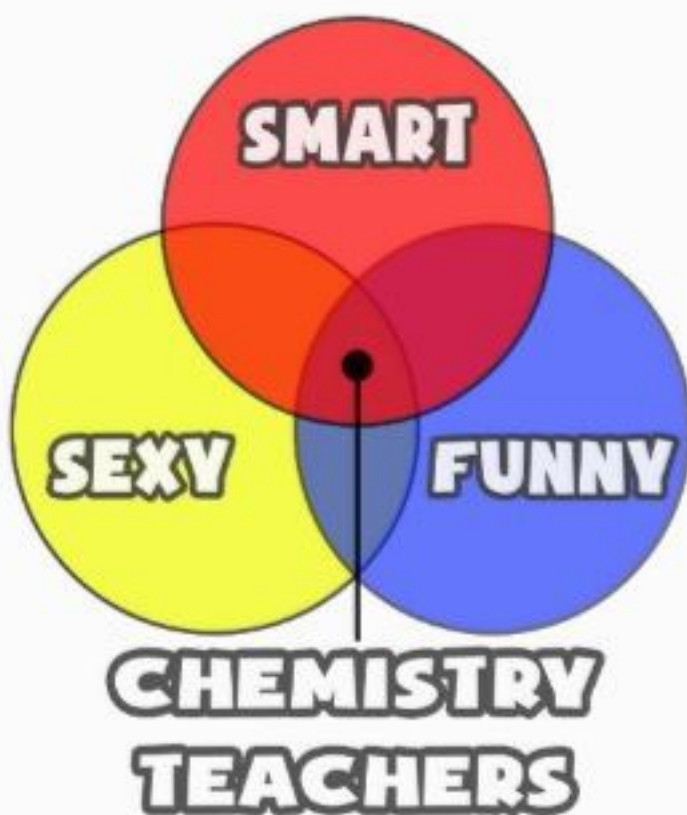

- Eagle** (light blue) overlaps with **Human** and **Snake**.
- Snake** (purple) overlaps with **Human**, **Eagle**, and **Echidna**.
- Lion** (orange) overlaps with **Human** and **Manticore**.
- Manticore** (red) overlaps with **Human** and **Lion**.
- Dog** (light purple) overlaps with **Human** and **Cynocephalus**.
